Software architect with more than 9 years' experience in the IT industry. Before entering the IT world, I worked for 6 years as a retailer. In both experiences, I was followed by people over 30 years of experience, one a programmer and one a seller who started in the 70's. I was born as a C++ programmer before moving to developments of any kind in JAVA. I have more than 8 years as personal experience as developer of trading system with different type of software languages. Excellent team building skills, excellent ability to always find quick, effective, and high profiled solutions.

Capacity / Knowledge

Software Architect / Computer Science

Capacity: Design of complex software architect.

Targets: Structured design software architectures according to the standard model in hierarchical pyramid, able to ensure reusability, consistency, integrality, flexibility, modularity, changeability, adaptability and scalability of the code. Experience with workflows and complex data structure.

Algorithms Builder / Business Intelligence

Capacity: Development of all types of algorithms.

Targets: Development of algorithms based on different computational metrics, recursive, interpersonal, decision-making, mathematical, statistical and analytical.

Trading System / Financial Market

Capacity: Technical analysts, Fix protocol, and Algorithms.

Targets: Development of trading algorithms on property platform or in custom software. High capacity to design trading system with any type of software languages.

Retailer / Consumer

Capacity: Retailing of any type of object.

Targets: Sale of clothing in the street markets sector, acquiring the ability to understand the dynamics of sales in general terms and to bring the buyer to a particular sale.

Academic Training

1998-2003 High School Diploma

"Leonardo da Vinci" Scientific High School of Crema

Scientific training with notions of mathematic, physic, philosophy, Latin and science

2003-2006 Bachelor Degree in "Security of the network"

Public University of Milan

Oriented training to the security of information systems, with notions of risk analysis, encryption, penetration test and basic programming.

Qualities

Creative
Adaptable
Go-Ahead
Organized
Strict

Experience

Own: clothing retail in market place and trading algorithms.

GESP s.r.l.: software developer and prototype builder.

Accenture: software architect, security consultant and problem solving resource

Languages

Italian: Native
English: Intermediate
Read Advanced
Write Intermediate
Speak Sufficient

Software

Architecture	Expert
Algorithms	Expert
JAVA	Expert
JavaScript	Expert
Services	Expert
Security	Good
C++	Good
Web	Good

Other Information

Driver's license: Level B (Car)
Availability: 45 days
Mobility: all world
